WHITEPAPER

**Intrastat thresholds & deadlines
for all EU Member States for 2021**

Thank you for downloading our whitepaper - Intrastat thresholds and deadlines for 2021

Are you transporting goods across EU Member States? If so, this can result in the obligation to file Intrastat declarations. Intrastat is a detailed statistical reporting obligation. On the basis of this obligation, countries collect data for, among others, the national trade balance.

For this obligation, Intrastat thresholds and deadlines have been set per Member State for incoming and outgoing flows of goods. If the value of your movements of goods exceeds one of these thresholds within 1 year, you will be required to declare an Intrastat declaration.

Overview of Intrastat thresholds and deadlines for 2021

For each EU Member State, the thresholds and deadlines for arrival and dispatches of goods in Intrastat may differ. Our specialists made an overview of these thresholds and deadlines for all EU Member States for 2021. You'll find this overview on the next page!

Do you need support with your Intrastat declarations?

Would you like to know what Pincvision can do for you regarding your Intrastat processes? Pincvision has the **manpower, knowledge, network** and **systems** to completely relieve you so that you no longer have to worry about your trade compliance processes. [Read more about our Intrastat service on our website](#)
